2013-2014

Market leader in France and one of the top companies in its field,

Soparco is an industrial yet family-based French group
with a Europe-wide presence via a number of commercial subsidiaries
in Spain, Holland, Germany and England.

Providing services to horticulture and nurseries for over 40 years,
the principal driving force behind the company's development
has been its focus on expertise and innovation.

With a workforce of more than 200 staff, two production plants in France,
Soparco operates around the clock 7 days a week on premises covering almost 10 hectares,
producing more than 500 different types of containers,
transport trays and various other items for use in horticulture and nurseries.

Expertise and innovation

Innovation
for
growing

Soparco is today an industrial benchmark in its sector. It has a modern and efficient production facility, equipped with around 80 presses and blister pack machines, where pots, containers and other items are manufactured for use in horticulture and nurseries.

We upgrade our industrial equipment on a regular basis to guarantee optimal production and quality, incorporating the very latest technical innovations.

We are always seeking to provide the finest raw materials (most of which are recycled).

Polypropylene

Polystyrene

Polyethylene

We do everything to provide our customers with the highest level of service through sales teams at a local level, a sales administration department able to work in a variety of languages and highly responsive logistics teams.

We have over 30,000 m² of storage facilities enabling us to respond to your needs in the shortest possible time throughout the year.

We pride ourselves on listening to our customers and take full account of any problems you experience in your production process and sales networks.

Our research and development and marketing teams analyse the market and implement innovative solutions that fulfil your requirements. Each year, we expand our existing wide range of new products enabling you to:

- Optimise or reduce your logistical costs;
- Automate your production and reduce labour costs;
- Offer attractive, innovative and logistically optimal "pots+trays" solutions;
- Enhance some of the items you produce by providing top of the range products;
- And innovate, around 550 models and more than 1500 different references available.

Our eco-responsible approach

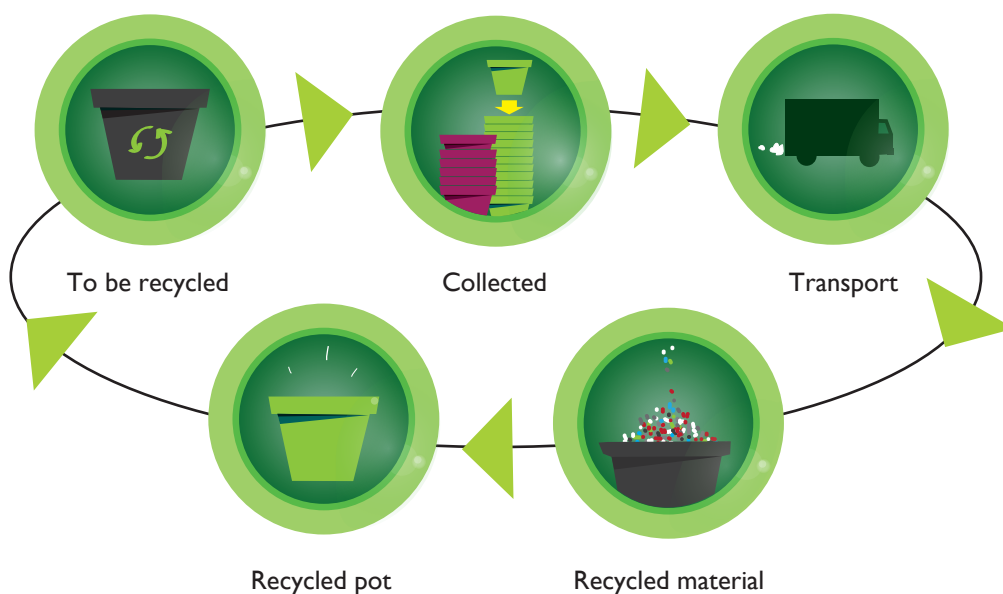

Alternatives to plastic flower pots: the organic or recycled pot

We carry on our development in order to offer you a majority of Bio sourced products. Amongst the material (vegetal and renewable) that we use, we favour those which production has the lowest impact on the environment but also those that compete the less with our alimentary needs. This is how we have now the pleasure to present you our first range of "bio-sourced" containers with a vegetal origin (liners, bedding plant trays, round pots). Those innovations are promising and we go on claiming that the recycled plastic pot stays at a good place on the environmental level.

Horti-eco device of Soparco

Environmental protection and sustainable development are at the heart of our commitment. For many years now, we have been seeking ways to reduce negative impacts on the environment in all areas of our activity.

Recycled materials

In 1985, we introduced into our production process recycled polypropylene, taken from salvaged end-of-life vehicle parts. Today around 85% of the plastics we use are recycled, from a variety of sources (packaging from food products, pharmaceuticals and toys, plastic caps, vehicles, textiles, used plant pots, etc.).

Waste sorting and recycling

All packaging waste produced by our manufacturing activity is sorted and separated for recycling. Any chemicals (oils, used cleaning products) are also dispatched to specialist companies for recycling.

Soparco labelling system

Innovation
for
growing

Trays and several Soparco pots are delivered with Soparco labelling system. The labelling system is explained here under:

C: Slot. Curved slot at the end of the bedding plant trays.

F: Slot box

The curved slot is placed in the bottom of the slot box.

G: Box with teeth 8 mm and more.

The 4 teeth are inside the box.

Face view

G2: Box with teeth 7 mm and less.

Printing in offset

- Minimum order 25 000 pieces.
- **Film costs:** €70 per colour and per pot size.
For a EAN-code quality: €31 per EAN-code.
- **Printing costs:** For the other pots, we print in offset with the same price for 1 to 4 colours and per pot size.
- Each quantity is per pot size. You can't add different pot sizes to make a total order.
- Deadline: Please consult us for lead time.

Available in those different diameters

9 - 10,5 cm

12 cm

13 - 14 cm

Sticky labels

- Standard labels: 24x40 mm.
- Colour: white, black printing.
- For less than 15 000 pieces per type of label, a lump sum of €20 will be invoiced.

Bio thermoformed range

Soparco's «Organic» range of thermoformed pots are manufactured using «bio-sourced» materials. The industrial and automated production process for these pots has been designed and validated in-house. These thermoformed pots can be used with the same irrigation systems as those made from recycled polystyrene or polypropylene.

An eco-responsible catalogue

Our catalogue is printed on certified paper PEFC
(Certification of an eco-management of the forest)
within a 30km radius from the distribution center
in order to reduce the transport and the discharge
of CO₂

Subsidiary Soparco

Soparco sales supports

Soparco, an international company
